

USING TECHNOLOGY TO STUDY CELLULAR AND MOLECULAR BIOLOGY		
Utah Biology Core Curriculum Standards		
Lesson	Standard	Objective
3	3:2.d	Relate the tissues that make up organs to the structure and function of the organ.
Utah Science Intended Learning Outcomes: High School		
Lesson	ILO	Descriptor
2, 3	1.a	Observe objects, events and patterns and record both qualitative and quantitative information.
1, 2, 3	1.b	Use comparisons to help understand observations and phenomena.
2, 3	1.c	Evaluate, sort, and sequence data according to given criteria.
1, 2, 3	1.d	Select and use appropriate technological instruments to collect and analyze data.
3	1.e	Plan and conduct experiments in which students may: Identify a problem, formulate research questions and hypotheses, predict results of investigations based upon prior data, identify variables and describe the relationships between them, plan procedures to control independent variables, collect data on the dependent variable(s), select the appropriate format (e.g., graph, chart, diagram) and use it to summarize the data obtained, analyze data, check it for accuracy and construct reasonable conclusions, and prepare written and oral reports of investigations.
2, 3	1.f	Distinguish between factual statements and inferences.
	1.g	Develop and use classification systems.
1, 2, 3	1.h	Construct models, simulations and metaphors to describe and explain natural phenomena.
1	1.i	Use mathematics as a precise method for showing relationships.
2, 3	1.j	Form alternative hypotheses to explain a problem.
1, 2, 3	2.b	Raise questions about objects, events and processes that can be answered through scientific investigation.
3	2.c	Maintain an open and questioning mind toward ideas and alternative points of view.
3	2.e	Evaluate scientifically related claims against available evidence.
3	3.a	Know and explain science information specified for the subject being studied.
1, 2, 3	3.c	Apply principles and concepts of science to explain various phenomena.
2, 3	3.d	Solve problems by applying science principles and procedures.
2, 3	4.a	Provide relevant data to support their inferences and conclusions.
All lessons	4.b	Use precise scientific language in oral and written communication.
All lessons	4.c	Use proper English in oral and written reports.
1	4.e	Use mathematical language and reasoning to communicate information.

UTAH ALIGNMENT FOR NIH SUPPLEMENT USING TECHNOLOGY TO STUDY CELLULAR AND MOLECULAR BIOLOGY

1, 3, 4	5.a	Cite examples of how science affects human life.
1, 4	5.b	Give instances of how technological advances have influenced the progress of science and how science has influenced advances in technology.
3	5.c	Understand the cumulative nature of scientific knowledge.
1, 4	5.d	Recognize contributions to science knowledge that have been made by both women and men.
1, 4	6.a	Science is a way of knowing that is used by many people, not just scientists.
2, 3	6.b	Understand that science investigations use a variety of methods and do not always use the same set of procedures; understand that there is not just one "scientific method."
2, 3	6.c	Science findings are based upon evidence.
3	6.d	Understand that science conclusions are tentative and therefore never final. Understandings based upon these conclusions are subject to revision in light of new evidence.
3	6.e	Understand that scientific conclusions are based on the assumption that natural laws operate today as they did in the past and that they will continue to do so in the future.
3	6.g	Understand that various disciplines of science are interrelated and share common rules of evidence to explain phenomena in the natural world.
3	6.h	Understand that scientific inquiry is characterized by a common set of values that include logical thinking, precision, open-mindedness, objectivity, skepticism, replicability of results and honest and ethical reporting of findings. These values function as criteria in distinguishing between science and non-science.
4	6.i	Understand that science and technology may raise ethical issues for which science, by itself, does not provide solutions.

Utah Algebra I Core Curriculum Standards

Lesson	Standard	Objective
1	1:2.c	Compute solutions to problems, represent answers in exact form, and determine the reasonableness of answers.

Utah Mathematics Intended Learning Outcomes: High School

Lesson	ILO	Descriptor
1	2	Become proficient problem-solvers by posing appropriate questions, selecting appropriate methods, employing a variety of strategies, and exploring alternative approaches.
1	3	Think logically, using inductive reasoning to formulate reasonable conjectures and using deductive reasoning for justification, formally and informally.
1	4	Cooperatively and independently explore mathematics, using inquiry and technological skills.
1	5	Make connections between mathematical ideas, between mathematics and other disciplines, and to life.
1	6	Communicate mathematics through verbal, written, and visual representations, using precise mathematical language

UTAH ALIGNMENT FOR NIH SUPPLEMENT USING TECHNOLOGY TO STUDY CELLULAR AND MOLECULAR BIOLOGY

		and symbolic notation.
Utah Language Arts Core Curriculum Standards: Grades 9 & 10		
Lesson	Standard	Objective
2, 3, 4	1:2.a	Analyze the purpose of external text features and structures in a variety of informational texts (e.g., textbooks, advertisements, posters, graphs, charts, maps, schedules, product instructions) (9). Analyze the purpose of external text features and structures in a variety of electronic texts (e.g., e-mail, electronic newspapers, web pages) (10).
2, 3, 4	1:2.c	Infer meaning from implicit information in text (9). Use explicit and implicit information to arrive at conclusions (10).
2, 3, 4	1:2.d	Distinguish relevant from merely interesting information (9). Evaluate text for reliability and accuracy (10).
2, 3, 4	2:1.a	Compare/contrast significant or essential ideas, facts, or events (9).
2, 3, 4	2:1.b	Analyze facts, events, or ideas to create meaning (10).
2, 3, 4	2:1.c	Compare/contrast connections between texts, between texts and self, and between texts and different world connections. (9 & 10)
3, 4	2:2.a	State a thesis that clearly takes a position (9). Experiment with varied organizational patterns and forms of writing (e.g., memos, letters, reports, essays, brochures) (10).
3, 4	2:2.b	Organize writing effectively using leads, details, transitions, conclusions, personal experience, facts, anecdotes, examples, and paraphrased ideas (9). Support arguments with personal experience, detailed evidence, examples, and reasoning (10).
Utah Language Arts Intended Learning Outcomes: Grades 9 & 10		
Lesson	ILO	Descriptor
All lessons	2.c	Develop thinking and language acquisition together through interactive learning.
All lessons	4.a	Give and seek information in conversations, in group discussions, and in oral presentations.
All lessons	4.b	Use questioning techniques to gain information.
All lessons	4.c	Participate in and report on small group learning activities.
4	4.d	Develop and deliver individual presentations.
2, 3, 4	5.b	Access background knowledge to prepare to read and enjoy texts.
2, 3, 4	5.c	Use meta-cognition strategies during reading to monitor comprehension.
2, 3, 4	5.d	Improve comprehension by using strategies when meaning breaks down.
2, 3, 4	5.e	Retain information from and respond to text after reading.
3, 4	6.e	Develop collaborative writing skills to prepare for workplace writing.
3, 4	6.f	Understand that writing is a tool for thinking: solving problems, exploring issues, constructing questions, addressing inquiry.

UTAH ALIGNMENT FOR NIH SUPPLEMENT USING TECHNOLOGY TO STUDY CELLULAR AND MOLECULAR BIOLOGY

3, 4	6.g	Understand that reading and writing are interrelated: writers approach new reading experiences with enhanced appreciation for the text.
Utah Health Education Core Curriculum Standards: High School		
Lesson	Standard	Objective
There are no health education core curriculum standards met in this supplement.
